

Concentrated media ownership interferes with our opportunity for truth. Even now, many radio stations depend on a single source of information which is shared. Companies use their power to manipulate what we hear and don't hear (or read or see). Independent thinking is to be protected and cherished in this of all countries. We didn't get the full picture during the recent Iraqi war. What we saw and the rest of the world saw on TV was quite different. I don't want to see the news situation get any worse than it is today. Please leave the current restrictions on ownership in place. Thank you for the opportunity to comment.
